1 General information

This document lists the unit and subject award entry codes for OxfordAQA, for all series in the academic year 2022/23. Further information about making entries is available from the Exams administration page of our website oxfordaqa.com

Series

All entries for our examinations are collected by series, irrespective of the method of entry you use to submit them. The closing date for the receipt of entries and the date of publication of results for particular examinations determine each series.

Entry codes

Section 4 contains all the entry codes for all the exams (subject awards, options, units and components) that are available in any given series. You must use the appropriate entry code irrespective of your method of entry.

Basedata (containing information on the specifications, units, options and components) will also be provided for each series for schools wishing to submit entries by EDI.

A separate entry, using the appropriate entry code, is required for every assessment (subject award, unit or option) for which a result is to be reported.

Before making an entry for a particular subject, you should refer to:

- the specification for the subject
- any changes to examination provision detailed in the appropriate specification
- any restrictions on entry detailed in Section 2 of this document.

Please see the Exams administration page of our website oxfordaqa.com for full details on basedata and submitting entries.

2 Restrictions on entry in 2022/23

Prohibited combinations

Before making an entry for a particular subject, you should refer to any statement in the specification that deals with prohibited combinations of units and specifications.

Students entered for prohibited combinations of subjects will be reported on the *Centre Entry Query Report*. You will be required to cancel or amend the entry. You must inform us of these decisions by EDI or Centre Services.

Private candidates

A private candidate is someone who enters for examinations through an OxfordAQA approved school but is not enrolled as a student there. Private candidates may be self-taught, home-schooled or have private tuition with a tutor or through a distance learning organisation.

Schools may make entries for private candidates with the prior agreement of OxfordAQA. If you are an approved OxfordAQA school and wish to accept private candidates, please contact OxfordAQA at info@oxfordaqa.com.

Private candidates may also enter via the British Council; please contact your local British Council office for details.

Not all specifications are available to private candidates and those with internally-assessed components may have restrictions.

AQA specifications

There are restrictions on new schools entering for AQA specifications, where an equivalent OxfordAQA specification exists. Please see the Make entries page of the [aqa.org.uk](https://www.aqa.org.uk) website (under 'Other useful documents') for more details.

3 Explanatory notes on the entry code tables

This document lists the unit, option and subject award entry codes for OxfordAQA, for all series in the academic year 2022/23.

- Subjects are grouped by qualification (International AS and A-level, International GCSE etc)
- In each section, subjects are in alphabetical order by specification

Example entry code table (please note that this table is for illustrative purposes and may not reflect series available in the current year).

Each table contains the following information:

- ① Details of the specification including
 - Specification title
 - Qualification Including Full Course, Double Award and so on as appropriate. Where they differ, Centre Services qualification codes are shown in brackets, for example (OXA) or (OXG).
 - Specification code not to be confused with the Entry Code – see ②.
 - Basedata group code this is the code under which all entry codes for a specification can be found in the electronic basedata files (see the Exams administration page of our website oxfordaqa.com for details).
- ② Each entry for a subject award, unit or option should be recorded by means of an Entry Code. A separate entry, using the appropriate entry code, is required for every assessment (subject award, unit or option) for which a result is to be reported. It is essential that you make entries using only these entry codes.
- ③ The series in which a particular examination is available and the closing date for entries for that series. The tables show only those series in which entries for the specification are collected.
- ④ For most specifications, the weighting of each unit towards the overall award.
 - AS International Advanced Subsidiary
 - A-level International A-level
- ⑤ Where applicable, the maximum uniform mark (UMS).
- ⑥ Description of the units or options within a specification for which an entry can be made.
- ⑦ For modular specifications, entry details for the overall subject award together with information of the valid combinations of units which must be taken to give a subject award.
- ⑧ Information about the specification, units or options including details of the following:
 -  information that is relevant to entries
 -  any changes to specifications or other important information
 -  any prohibited combinations
 -  information relating to conditions that apply to the entry of private candidates.

Key to symbols

The following symbols may be used in the entry tables:

-  Indicates components/elements for which marks may be carried forward from a previous exam series.

For the lifetime of the specification there is no limit on the number of occasions on which the marks can be re-used or on the period of time since the original result. However, other restrictions may apply (please see the information under the entry code table for the specification).
- *** Refer to the information for the specification.
- **** Refer to the information for the specification.
- †** Refer to the information for the specification.
-  Indicates specifications, units or components for which teachers and/or students need to have preliminary material or early papers before the main exam period.

Where early material applies to the specification as a whole the symbol is shown with the specification details. Otherwise it is shown against the relevant unit or component.
